

Display Sanitiser

INVEST IN WHAT MATTERS

MINIMISE THE RISK OF COVID-19 & GET BACK TO SAFE BUSINESS OPERATION

IF YOU'RE IN THE HOSPITALITY INDUSTRY AND YOUR BUSINESS IS PLANNING ON REOPENING AFTER COVID-19

then you must comply with the new strict health regulations, safety measures and rules that have been set by the government.

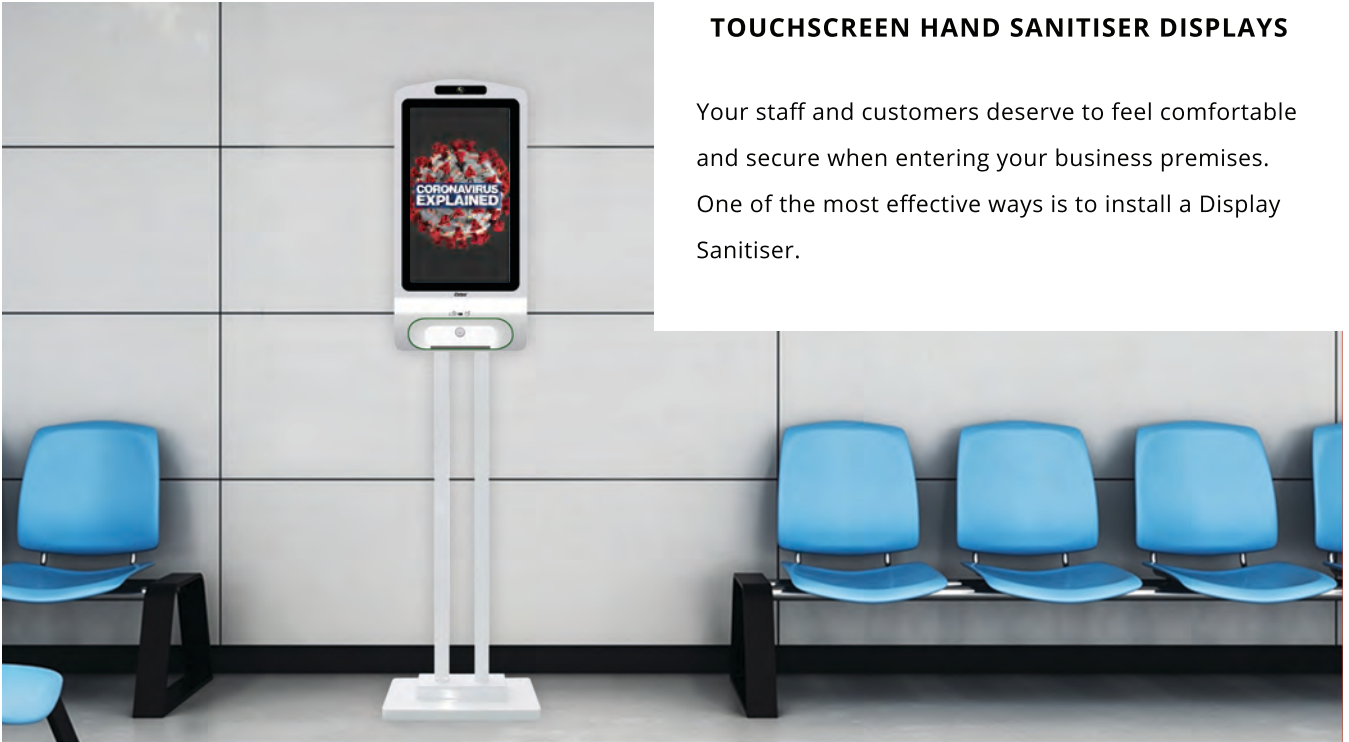

To stop the spread it has been requested that any clubs, pubs, hotels, food courts, bistros, restaurants or businesses that maintain constant high traffic areas during operation must have both digital signage and hand sanitiser available at all times.

As a business owner, manager or employee it is now your duty of care to educate your patrons and your local community on how to act responsibly during this time so that we can get back to business as usual.

PROMOTE PROPER HYGIENE, PROTECT YOUR CUSTOMERS & KEEP YOUR TEAM SAFE WITH TOUCHSCREEN HAND SANITISER DISPLAYS

Your staff and customers deserve to feel comfortable and secure when entering your business premises. One of the most effective ways is to install a Display Sanitiser.

Operated through a bright digital high definition display, the display sanitiser allows your business to display effective, clear & engaging COVID-19 updates and other marketing messages to patrons and staff.

Perfect for entrances and other high traffic areas, the modern design fits in with any business decor, styling and room size.

By having just one or multiple Display Sanitiser's installed within your premises, you instantly increase the probability of maintaining a clean and COVID-19 free environment.

Here is an example of how a local bar is using the Display Sanitiser.

COMMUNICATE YOUR LATEST PRODUCTS, DEALS & OFFERS IN MORE WAYS THAN ONE

Not only does the Display Sanitiser allow you to comply with government safety measures, it also gives you a new edge when communicating with your audience.

Easily access each of your Display Sanitiser's via an internet connection. You can update your screens with your latest products, meal deals, menus, discounts, event promotions and other engaging business related content in between the COVID-19 safety update messages.

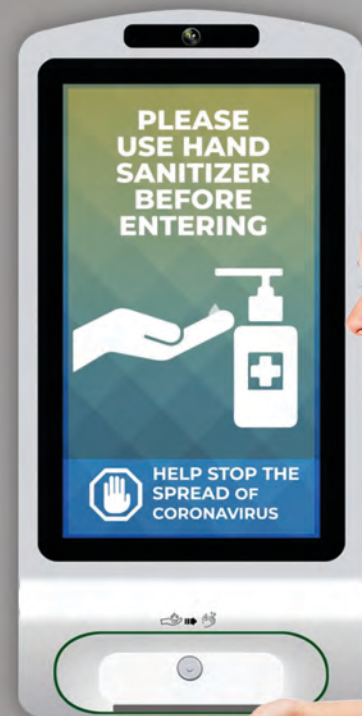

By having the freedom to combine the promotion of safety updates & marketing promotions you are now setting the standard of how businesses will likely communicate with their patrons in the future.

CLEAN MESSAGING HAS NEVER BEEN SO EASY

HAND SANITISER STATION

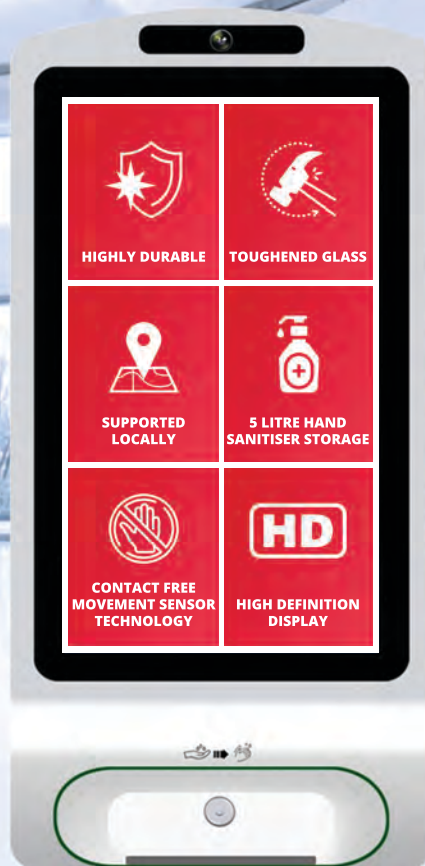

THE BUILT IN HAND SANITISER STATION IS OPERATED THROUGH A MOVEMENT SENSOR, MEANING IT IS COMPLETELY CONTACT FREE.

The hand sanitiser is dispensed within 3 seconds without any need to press a button or pump a bottle. The hand sanitiser station stores up to 5 litres of sanitiser liquid or gel, over 65% more than other products. This means less time is needed to keep refilling the sanitiser. Light signals indicate when the dispenser needs refilling ensuring the sanitiser station remains filled.

UPDATING MESSAGES VIA THE DIGITAL DISPLAY

The only requirement needed when updating your digital is a stable internet connection. By accessing the cloud either through a local network or 4G connection (as it may be WI-FI or network data point) you can update your device with evolving government regulations instantly via remote cloud access.
